

Authors' Index

A

Abbas I., Elghawabi H., Younan W., Sabour A., Gobrial M.

Impact of exercise on bone mineral density (SS 110), B-0041

Abdel Razek N.M., Kattabei O., Nassif M.K., El Lithey M.

Visualisation of myofascial trigger points in low back muscles by real-time sonoelastography (SS 510), B-0294

Abdel Razek N.M., Azab A.O.

Role of proton MR spectroscopy in the high field magnet (3T) in diagnosis of indeterminate breast masses (BIRDS 3&4) (SS 1702), B-0804

Abdel Wahab M.

Oncologic imaging and paleoradiology in Egypt: the past, present and future: Introduction (EM 3), A-238

Abdullah B.J.J., Dhillon S.S., Das A., Roslani A.C.

Intra-arterial infusion of allogenic mesenchymal stem cells for critical limb ischaemia and foot ulcers safety and efficacy (SS 609), B-0421

Abe T., Izuka T., Motohashi N., Uema E., Akiyama Y., Shiraishi Y., Ogata H., Ito M., Kudou S.

Evaluation of pulmonary blood flow using new method of dynamic x-ray examination: comparison with 99mTc-MAA perfusion scintigraphy (SS 1304), B-0621

Abou El-Ghar M., El-Assmy A., Refaie H., El-Diasty T.

Selective arterial embolisation of symptomatic giant renal angiomyolipoma: efficacy, complications and long-term outcomes (SS 1807), B-0935

Abramyuk A., Hietschold V., Zoepfel K., Appold S., von Kummer R., Abolmaali N.

Radiochemotherapy-induced changes of local tumour blood supply estimated by DCE-CT in head and neck tumours (SS 608), B-0466

Abreu V., Carter S., Nordberg A.

Multi-tracer PET early frames as a functional marker in Alzheimer's disease (SS 511), B-0324

Adla T., Veselka J., Zemanek D., Cadova P., Suchanek V., Miksik L., Rocek M.

Evaluation of left main coronary in-stent restenosis by dual source CT: comparison with invasive angiography and intravascular ultrasound (SS 503), B-0364

Afshar-Oromieh A., Kratochwil C., Linhart H., Haberkorn U., Giesel F.L.

Comparison of lesion detection in patient with cranial meningiomas using 68Ga-DOTATOC-PET/CT and contrast-enhanced MRI (SS 1716), B-0782

Agnello F., Charton J., Jeung M., La Tona G., Galia M., Midiri M., Roy C.

Utility of 3 Tesla diffusion-weighted magnetic resonance (DWMR) imaging for the characterisation of small solid renal tumours (SS 1307), B-0666

Ahearn T.S., Petty R., Bain G., Denison A., Welsch A., Cunningham V., Schweiger L., Gilbert F.

Perfusion CT sub-classifies FDG-PET metabolic responders in oesophagogastric adenocarcinoma (SS 116), B-0014

Åhlström Riklund K.

Upcoming challenges in radiation protection: To understand new challenges, such as imaging in asymptomatic individuals (PC 16), A-520

Aime S.

Basics in molecular imaging (2): A. MR contrast agents for targeted MR imaging (MC 23B), A-121

Aime S.

Imaging highlights: monitoring disease and therapy: Get trained on imaging cell therapies with probes and procedures developed by ENCITE (ENCITE), A-432

Akata D.

Abdominal emergencies: US resists CT! B. Why lose time with US when CT gives you all you need to know? (MC 824), A-197

Akata D.

Palpable abdominal mass: A. Clinical considerations (CC 1118), A-267

Al-alawi E.A., Al-sugair A., Javed A., Al-Gafri A., Almuhaideb A.I., Fathala A., Tuli M., Abouzed M.M.

Role of 18FDG PET-CT in the follow-up of paediatric patients with Ewing sarcoma and primitive neuroectodermal tumour (SS 606), B-0470

Al-Butmeh F., Kroker L., Kerl J.M., Larson M.C., Bodelle B., Schell B., Beeres M., Vogl T.J., Bauer R.W.

Evaluation of acute pulmonary embolism detection using non-linear blending in dual energy computed tomography (SS 515), B-0343

Alavi A., De La Fuente J.

The importance of advanced MRI techniques as the definitive diagnostic tool in the differentiation between osteomyelitis and osteonecrosis in children with sickle cell disease (SS 1712), B-0863

Alazzawi S., Sprenger De Rover W., Morris-Stiff G., Lewis M.H.

Erect chest radiograph in the setting of the acute abdomen: essential tool or waste of resources and unnecessary (SS 1717), B-0840

Alberich-Bayarri A., Uribe S., Sanchez-Gonzalez J., Sanz-Requena R., Costa S., Marti-Bonmati L.

In vivo MRI characterisation of the myocardium with a diffusion-weighted sequence in 3T (SS 103), B-0134

Albrecht T.

Is there any advantage of volume navigation and needle tracking techniques in the management of oncology patients? (SY 20)

Albrecht T.

US and contrast-enhanced US for focal lesions: A. Evaluation of focal liver lesions (E³ 620), A-125

Alejandro Lafont E., Schaaf H., Mueller T., Obert M., Howaldt H., Krombach G., Gizewski E.

Pre- and intraoperative determination of tumour extent and bone infiltration in the head-and-neck region: a comparison of multislice computed tomography (MSCT), high-resolution flat-panel volumetric CT (VCT), and histopathologic methods (SS 608), B-0465

Alexandre N., Fontaine M.A., Suarez B., Mompoin D., Becchio J.

Hypnosis in the management of claustrophobic MRI patients (SS 614), B-0496

Alicioglu B., Yilmaz B., Bulakbasi N., Copuroglu C., Yalniz E., Aykac B.

Is there any preoperative MRI predictor in patients with degenerative lumbar stenosis? (SS 1810b), B-0953

Alison M., Sebag G.

Children's bones and joints: A. Imaging of sports injuries (RC 1412), A-429

Alizai H., Virayavanich W., Joseph G.B., Nardo L., Liebl H., Jungmann P., Nevitt M.C., McCulloch C.E., Link T.M.

UCSF score: a novel quantitative assessment score for cartilage lesions in early osteoarthritis - data from the osteoarthritis initiative (SS 610), B-0433

Alkadhi H.

How I report: B. Coronary CTA (RC 403), A-101

Alkubeyyer M.A., Erickson B.J., Fletcher J.G.

Improving anorectal angle measurement reproducibility by a semi-automated method (SS 201a), B-0192

Allen G.M.

Sports injuries: US or MRI?: Chairman's introduction (RC 1210), A-329

Alorainy I.A., Bosley T.M., Salih M.A., Oystreck D.T., Al-Malki S., Al-Suhaibani A.H., Khiari H., Abu-Amero K.K.

The relation of neuroimaging findings in carbonic anhydrase type II deficiency syndrome to cognitive disturbance and visual loss (SS 511), B-0329

Alrajhi S., Alhumayyd S., Kashani H., Odedra D., Blobel J., Paul N.S.

Image quality and radiation dose optimisation for high-resolution CT pulmonary angiography using 100kVp and automatic exposure control (SS 504), B-0279

AlRashidi N.M.M.R., Waiter G., Ahearn T., Gilbert F.J., Redpath T.W.

The influence of hormonal fluctuations on quantitative diffusion-weighted magnetic resonance imaging (DW-MRI) of the glandular breast tissue in healthy premenopausal participants at 3T (SS 102), B-0071

Alsharif W.

MR image quality and correction methods (Student Session 4), H-17

Alustiza J.M., Arenas J., Von Wichmann M.A., Castiella A., Emparanza J.I., Salvador E., Garcia-Bengoechea M., Zapata E.

Diffused-weighted MRI for quantification of liver fibrosis (SS 501), B-0336

Alustiza J.M., Castiella A., Emparanza J.I., Zapata E., Costero B., Dez M.I., Salvador E.
Liver iron concentration quantification by MRI: are recommended protocols accurate enough for clinical practice? (SS 1801b), B-0958

Amakawa K.

Contrast medium injection protocol for CT angiography with CT contrast medium dose adjusted to body surface area with simulation (SS 1806), B-0976

Amaral H.T.A.S., Murta Jr. L.O., Wichert-Ana L., Sakamoto A.C., Azevedo-Marques P.M.
Image registration in a hybrid routine using Shannon-Tsallis entropy for the statistical parametric mapping (SPM) (SS 505), B-0378

Amarteifio E., Wormsbecher S., Krix M., Demirel S., Braun S., Delorme S., Boeckler D., Kauczor H.-U., Weber M.-A.

Accuracy of dynamic contrast-enhanced ultrasound and transient arterial occlusion for diagnosis of peripheral arterial disease (SS 1315), B-0709

Amato M., Larici A., del Ciello A., Devicienti E., Corbo G., Valente S., Bonomo L.

Reproducibility of automatic airway measurements with multidetector computed tomography (MDCT) in inspiratory and expiratory scans (SS 604), B-0414

Amet S., Choukroun G., Launay-Vacher V., Frances C., Tricotel A., Stengel B., Deray G., Clement O.

Prevalence of nephrogenic systemic fibrosis in dialysis patients: the Pro-FINEST study (SS 1306), B-0700

Amin M.F., Abd El Kafy A.A.

The diagnostic accuracy of multidetector computed tomography with multiplanar reformatted imaging and virtual cystoscopy in the early detection and evaluation of bladder carcinoma (SS 207), B-0208

Amin M.F., Hassan A.M., Barakat K.I.

The accuracy of dynamic magnetic resonance imaging in evaluation of internal derangement of the temporomandibular joint: comparison with arthroscopic findings (SS 1810a), B-0914

Andersson M., Jägersvall K., Eriksson P., Persson A., Granerus G., Smedby Ö.

How should renal artery stenoses be measured? (SS 1315), B-0713

Andersson T., Söderman M.

Angioplasty and stenting of extra and intracranial arteries: B. PTA and stenting of extracranial arteries (RC 1411), A-414

Andres C., Luecke C., Foldyna B., Grothoff M., Nitzsche S., Schmidt A., Scheinert D., Gutberlet M., Lehmkuhl L.

Dynamic (dCTA) versus static (sCTA) computed tomography angiography after abdominal aortic endovascular aneurysm repair (EVAR): influence of enhancement patterns and optimal bolus timing on endoleak detection (SS 115), B-0118

Andreu J.

Common radiological problems: cardiovascular: A. Looking at the heart in chest x-rays (E³ 1720a), A-533

Annoni A.D., Pontone G., Formenti A., Andreini D., Nobili E., Besana F., Ballerini G., Pepi M., Montorsi P.

Comparison of 3 different evaluation criteria of carotid artery stenosis with 64-slice CT: role of cross-sectional area versus percent diameter stenosis (SS 1815), B-0980

Antoch G.

Peritoneal carcinomatosis: What is the added value of PET/CT? (SF 8a), A-193

Antoch G.

Hybrid imaging systems: B. Clinical PET/MRI (RC 1413), A-421

Anzalone N.

Choice of contrast in CNS MRI: what is the impact? (SY 5)

Anzidei M., Napoli A., Zaccagna F., Saba L., Cartocci G., Bertaccini L., Noce V., Boni F., Catalano C.

Peripheral MRA at 3T: intraindividual comparison between nonenhanced ToF and SSFP sequences vs contrast-enhanced MRA for the detection of clinically relevant stenosis (SS 1315), B-0712

Apfaltrer P., Hanna E., Schoepf U.J., Spears J., Rowe G., Harris D., Schönberg S.O., Fink C., Vliegenthart R.

Radiation dose and image quality at high-pitch CT angiography of the aorta: intra-individual and inter-individual comparison with conventional CT angiography (SS 1813), B-0991

Apfaltrer P., Schoendube H., Schoepf U.J., Schindler A., Allmendinger T., Vogt S., Stierstorfer K., Bruder H., Ebersberger H.U.

A temporal resolution improvement method for cardiac CT using 120° of projections: initial patient experience (SS 1813), B-0992

Apfaltrer P., Weilbacher F., Meyer M., Henzler T., Walter T., Gruettner J., Schoepf U.J., Fink C.

Comparison of high sensitive troponin I and quantitative CT parameters for prediction of adverse clinical events in patients with acute pulmonary embolism (SS 1304), B-0625

Applbaum Y., Hirschenbein A., Appelbaum L., Libson Y., Sosna J.

CT-guided minimally invasive musculoskeletal procedures augmented by a novel optical navigation system (SS 1810b), B-0952

Apprigh S.R., Trattinig S., Welsch G.H., Noebauer-Huhmann I.M., Domayer S.

Assessment of articular cartilage repair tissue after matrix-associated autologous chondrocyte transplantation or the microfracture technique in the ankle joint using diffusion-weighted imaging at 3 Tesla (SS 1810a), B-0915

Arena A.

Outlook of radiology 2052: risks, challenges, and opportunities (Student Session 2), H-6

Argyropoulou M.I.

Neuroimaging in neonates, infants and children: when to do what: What is the potential and role of brain ultrasound in the MRI era? (SF 3), A-020

Argyropoulou M.I.

Imaging the paediatric spine: B. Inflammation, infection and tumours: the role of imaging (RC 812), A-235

Aristu J.J.

Ablation beyond radiofrequency: Stereotactic body radiation therapy (SBRT) (NH 8), A-189

Arkhipova I.

ER: basic principles: A. Logistics, ergonomics and organisation of an emergency radiology department (RC 417), A-076

Arnoldi A.P., Ingrisch M., Utzschneider S., Reiser M.F., Weckbach S.

Quantitative assessment of perfusion and permeability in osteochondritis dissecans lesions: feasibility and initial results (SS 110), B-0050

Arshad M.A., Sergot A., Blunt D., Morris L.

Scattered radiation doses to operators performing fluoroscopic studies on bariatric patients (SS 201a), B-0193

Aschoff A.J.

Protocols for body CT: tips and tricks (SY 7)

Athanasίου A.

Functional imaging of the breast: B. Ultrasound elastography (RC 302), A-032

Attenberger U.I., Morelli J., Michaely H., Rustemeier T., Schönberg S.O.

How useful is a quantified analysis of hepatobiliary phase imaging for the characterisation of focal hepatic lesions? A comparison of dynamic gadoteric acid contrast-enhanced (Gd-EOB-DTPA) MRI versus apparent diffusion coefficient (ADC) (SS 1701), B-0826

Aydingoz U.

Sports injuries: US or MRI?: C. Muscle and tendon by MRI (RC 1210), A-332

Ayuso C.

Liver imaging: always MR, or still a role for CT?: B. Why MR is the ultimate tool (MC 724), A-146

Ayuso C.

How can I be sure that I'm dealing with HCC?: HCC staging and patient stratification: what's new? (SF 11), A-288

Azarine A.A., Chandesris O., Picard C., Mousseaux E., Boutouyrie P., Mallat Z., Fischer A.

Frequent and widespread vascular abnormalities in human STAT3 deficiency detected by whole body MR and cardiac CT scan (SS 1703), B-0833

B

Bagatto D., Petralia B., Girometti R., Bazzocchi M.

The safety and efficacy of flow diversion treatment of intracranial aneurysms: preliminary results (SS 1309), B-0635

Baik S.H., Jin G.Y., Han Y.M.

Clinical application of tissue permeability factor for differentiation of benign and malignant pulmonary mass on dynamic contrast material-enhanced (DCE) MRI (SS 1704), B-0757

Bailey B.

Assessing novel technology: applications, performance and quality issues: The role of radiographers in respect to applications of novel technologies (SF 7b), A-175

Bak S., Ko S., Choi J., Song M., Shin J., Ji H.
Morphological assessment of the aortic valve using cardiovascular computed tomography and cardiovascular magnetic resonance in patients with severe aortic stenosis: comparison with intraoperative finding (SS 203b), B-0261

Balériaux D.
Focal neurological disorders: A. Clinical considerations (CC 1218), A-320

Bali M.A.
Abdominal MRI: standard and advanced protocols in clinical settings: C. Pancreas and bile ducts: how to study a patient with suspected chronic pancreatitis (RC 1501), A-439

Balleyguier C.S., Canale S., Mathieu M., Dromain C.
Functional imaging of the breast: A. Contrast-enhanced mammography (RC 302), A-031

Balleyguier C.S.
Breast cancer: A. Detection (E³ 1620), A-489

Baltzer P.A.T., Dietzel M., Kaiser W.A.
Functional imaging of the breast: C. MRI diffusion, perfusion and spectroscopy (RC 302), A-033

Baltzer P.A.T., Kaiser W.A., Burmeister H.P., Dietzel M.
MR-mammography at 3T in clinical practice: prospective single centre experience (SS 102), B-0074

Baltzer P.A.T., Benndorf M., Kaiser W.A., Dietzel M.
Kinetics of Gd-EOB-DTPA in liver lesions suspect for metastases: a systematic comparison of raw data with arterial-input-function corrected data (SS 501), B-0333

Baltzer P.A.T., Groeschel T., Burmeister H.P., Kaiser W.A., Dietzel M.
A simple and robust classification tree for differentiation between benign and malignant lesions in MR mammography (SS 905), B-0599

Baltzer P.A.T., Schelhorn J., Benndorf M., Kaiser W.A., Dietzel M.
Diagnostic performance and interobserver variation in quantitative proton magnetic resonance spectroscopy of the breast at 1.5T: a prospective single-centre cross-sectional study (SS 1702), B-0806

Baltzer P.A.T., Schelhorn J., Benndorf M., Kaiser W.A., Dietzel M.
Diffusion-weighted imaging of focal liver lesions: lesion size and image technique used have significant influence on diagnostic performance (SS 1701), B-0818

Bankier A.A.
Causation-based imaging review of lung disease: B. Non-infectious inflammatory lung disease (MC 1522), A-459

Banko B., Milenkovic R., Kratovac-Dunjic M., Lilic G., Djokic-Kovac J., Maksimovic R.
Preoperative staging of patients with cervical carcinoma: comparison of magnetic resonance imaging and histopathologic evaluation (SS 507), B-0307

Bannas P., Groth M., Rybczynski M., Sheikhzadeh S., von Kodolitsch Y., Grassner J., Lund G., Adam G., Habermann C.
Screening for aortic root aneurysms in patients with suspected or known Marfan syndrome: intraindividual comparison of enhanced and unenhanced MR angiography with echocardiography (SS 115), B-0114

Baptista T., Watton P., Holland E., Penrose J., Chiarini A.A., Byrne J., Reis J.
Computational fluid dynamics in patients treated with flow-diverter devices (SS 611a), B-0387

Barbot R., Le Marquand C., Pairon J., Paris C., Brochard P., Laurent F.
Do pleural plaques carry an excess of risk of lung cancer in asbestos-exposed workers? (SS 104), B-0026

Barentsz J.O.
Essentials in oncologic imaging: what radiologists need to know (part 3): C. Prostate cancer (MC 628), A-130

Barentsz J.O.
MRI in prostate cancer: C. New frontiers in imaging of the prostate (RC 1407), A-419

Barentsz J.O.
Prostate and urinary bladder: B. Prostate cancer: how to be successful for clinicians (CC 1621), A-498

Bargellini I.
Abdominal tumour evaluation: from morphology to biology: A. Morphological assessment of tumour extension (RC 301), A-010

Bargellini I., Bozzi E., Cicorelli A., Lunardi A., Turini F., Cioni R., Bartolozzi C.
Preprocedural 3D-CT image blending with fluoroscopy to guide catheterisation of proper hepatic artery during transarterial chemoembolisation: a feasibility study (SS 909), B-0528

Barkhausen J.
3D breast tomosynthesis: a problem solver for difficult cases in clinical routine (SY 1)

Barkhausen J.
Introduction (SY 3)

Barkhof F.
Acute central nervous system infections: C. Acute disseminating encephalomyelitis (CC 1519), A-446

Barkhof F.
How I report: B. MRI in common neurodegenerative diseases (RC 1911), A-558

Baron R.L.
Essentials in oncologic imaging: what radiologists need to know (part 3): B. Liver cancers (primary, metastases) (MC 628), A-129

Bartels A., Oevermann E., Hollmann S., Marxsen J.H., Vogt F.M., Kovacs A., Hunold P.
Lymph node staging in colorectal cancer by contrast-enhanced CT: development of a new reporting model for higher diagnostic accuracy (SS 216), B-0160

Bartolozzi C.
Liver imaging: reality and virtuality: Chairman's introduction (NH 4), A-057

Bashir W.A., Connell D.
Sonographic-guided treatment of rotator cuff delamination tears using autologous blood: a one-year follow-up study assessing radiological features, pain scores and shoulder function (SS 510), B-0295

Bashir W.A., Connell D.A.
A new minimally invasive safe and reproducible technique for management of cervical radiculopathy: ultrasound-guided cervical transforaminal epidural nerve root injections (SS 510), B-0298

Basile A.
Evaluation and treatment of common venous disorders: A. Pelvic congestion (RC 709), A-176

Basilico R.
Abdominal emergencies: A. Non-traumatic (acute abdomen) (E³ 520a), A-113

Bassi C.
Pancreatic tumours: What the surgeon needs to know (MS 3), A-024

Battisti S., Gregori L., Arrigoni F., La Marra A., Zugaro L., Barile A., Masciocchi C.
Evaluation of echo-guided autologous platelet gel (APG) treatment in patients with tendinosis (SS 510), B-0296

Bauer J.S., Kohn L., Penzel J., Brucker P.U., Imhoff A., Rummeny E.J., Woertler K., Sauerschnig M.
MRI-based and clinical long-term results of isolated osteochondral transplantation (OATS) of the knee joint (SS 610), B-0438

Bauer R.W., Holthaus L., Schell B., Beeres M., Al-Butmeh F., Vogl T.J., Kerl J.M.
Dose and image quality of high-pitch dual source CT for the evaluation of cervical lymph node status: comparison to regular 128-slice single source CT (SS 608), B-0462

Bauer R.W., Schell B., Beeres M., Wichmann J., Bodelle B., Lehnert T., Vogl T.J., Kerl J.M.
High-pitch dual source CT pulmonary angiography in freely breathing patients (SS 1304), B-0619

Bauer R.W., Wrzesniak A., Bernhardt D., Lehnert T., Vega-Higuera F., Vogl T.J., Kerl J.M.
Fully automated assessment of right ventricular functional parameters from ECG-gated coronary CT angiography data: evaluation of prototype software (SS 1803), B-1000

Bauer R.W., Radtke I., Zhang S., Block T., Kerl J.M., Mack M.G., Graf T.G., Vogl T.J., Larson M.C.
True real-time cardiac MRI in free breathing without ECG-synchronisation using radial k-space sampling: initial results (SS 1803), B-1001

Baum T., Bauer J.S., Sidorenko I., Monetti R., Eckstein F., Matsuura M., Lochmueller E., Zysset P.K., Raeth C.
Scaling relations between trabecular bone mass and 3D microstructure in two locations of the human femur (SS 110), B-0045

Baum T., Joseph G.B., Alizai H., Carballido-Gamio J., Nardo L., Virayavanich W., McCulloch C.E., Majumdar S., Link T.M.
Baseline mean and heterogeneity of MR knee cartilage T2 are associated with morphological degeneration of cartilage, meniscus, and bone marrow over three years: data from the osteoarthritis initiative (SS 610), B-0436

Baumhauer M., Seitel M.

Dedicated workflow solution to facilitate consistent, reproducible, and efficient patient monitoring in oncological trials and routine (SS 1805), B-1013

Bauner K.U., Theisen D., Sandner T., Reiser M.F., Wintersperger B.J.

Magnetic resonance T1-mapping in acute myocardial infarction: from core to periphery (SS 103), B-0137

Bauner K.U., Durand M., Crean A., Nguyen E., Ley S., Wald R., Rakowski H., Paul N.S., Wintersperger B.J.

Inaccuracies in cine SSFP MR LV volumetric measurements in patients with LV hypertrophy: correction applying the mass conservation principle (SS 1803), B-1003

Bayraktutan U., Kantarci M.

Diffusion-weighted MR imaging of acute appendicitis in paediatric patients: comparison with conventional MRI and surgical findings (SS 101a), B-0053

Bazzocchi A., Brocchi S., Ponti F., Ambrosini V., Facchini G., Fanti S.

Positron emission tomography and lung nodules: prognostic value of standard uptake value (SS 204), B-0170

Bazzocchi A., Spinnato P., Garzillo G., Ciccarese F., Fuzzi F., Miglio L., Santilli L., Mignani S.

Detection of incidental vertebral fractures by MR-localiser in breast imaging (SS 1802), B-0942

Bazzocchi A., Spinnato P., Cenni A., Zappoli P., Fuzzi F., Filonzi G., Bianchi G., Rossi C.

Body composition changes after liver transplantation (SS 1801b), B-0963

Introduction (SY 21)

de Paepe K.N., Bevernage C., de Keyzer F., Wolter P., Oyen R., Verhoef G., Vandecaveye V.

Whole body diffusion-weighted imaging at 3 Tesla field-strength for early treatment assessment and treatment prediction in lymphoma (SS 1316), B-0611

De Paepe K.N., De Keyzer F., Wolter P., Oyen R., Verhoef G., Vandecaveye V.

Is whole body diffusion-weighted imaging at 3 Tesla field-strength feasible for staging lymphoma? (SS 1316), B-0612

de Roos A.

Imaging of ischaemic heart disease: B. MR perfusion imaging: how much quantification do we need? (RC 703), A-180

De Stefani S., Molinari C., Clauser P., Dal Col A., Londero V., Girometti R., Zuiani C., Bazzocchi M.

Breast MRI and ductal carcinoma in situ: when can we expect to have no enhancement? (SS 202b), B-0225

De Wever W.F.M., Zanca F., Jacobs A., Bergans N., Bogaerts R., Coolen J., Verschakelen J., Bosmans H.

Radiation dose to the radiologist during continuous CT-fluoroscopy-guided lung biopsy using different HandCARE options: how safe is it? (SS 1704), B-0753

De Wilde J.

Advances in technology for interventional radiology: general overview: MR interventional techniques (EF 1), A-220

De Wilde J.

Diagnostic radiology and pregnancy: C. Pregnancy and MRI: risks to the unborn child (RC 1213), A-353

De Zordo T., Vega-Higuera F., Goetti R.P., Plass A., Plank F., Klauser A., Leschka S., Alkadhi H., Feuchtnr G.

Quantification of myocardial ischaemia and infarcts by adenosine stress 128-high-pitch DSC (SS 203a), B-0242

Del Frate C.

How I report: A. Female pelvis MRI (RC 1207), A-344

Del Vescovo R., Di Paola V., Battisti S., Sansoni I., Grasso R., Beomonte Zobel B.

DW-MR and D-CE-MR: evaluation of the response in rectal cancer before, during and after neoadjuvant treatment (SS 1301a), B-0651

Delli Pizzi S., Madonna R., Giammarini A., Romani G.L., De Caterina R., Tartaro A.

In-vivo assessment of skeletal muscle ischaemia in diabetic rats by MR angiography, MR imaging and proton MR spectroscopy (SS 210), B-0188

Delrue L., Blanckaert P., Mertens D., Duyck P.

Variability of CT contrast enhancement in the pancreas: a cause for concern? (SS 201b), B-0230

Demaerel P.

Imaging the complications of cancer treatment: C. Complications of treatment in the CNS (RC 1616), A-507

den Dekker M.A.M., de Smet K., de Bock G.H., Tio R.A., Oudkerk M., Vliegenthart R.

Diagnostic accuracy of coronary CT angiography for stenosis detection according to calcium score: systematic review and meta-analysis (SS 503), B-0363

Dendl L.M., Landfried K., Jung E.M., Platz Batista da Silva N., Friedrich C., Stroszczyński C., Schreyer A.G.

Contrast-enhanced ultrasound for differential diagnosis of suspected GvHD in patients after allogeneic transplantation (SS 201a), B-0200

Derchi L.E.

Emergency radiology: where does US fit in?: A. Acute abdomen in adults: US vs CT (E³ 720b), A-155

Desai S.R.

Patterns in chest radiology: are there subtype patterns of ground glass opacity (GGO)?: A. Ground glass opacification: why do we see it and what can it mean? (RC 1104), A-298

Desponds L., Hoornaert B., Lendl M.

Advances in technology for interventional radiology: technology assessment: Panel discussion with angiographic equipment manufacturers (EF 2), A-253

Devaraj A.

Patterns in chest radiology: diffuse lung diseases - what the radiologist should know: B. From pattern recognition to disease diagnosis: a practical approach (part 1) (RC 1604), A-516

Dewey M.

Updated developments in coronary MSCT in patients with atrial fibrillation (SY 10)

Di Giampietro I., Liguori C., Sansoni I., Feliziani A., Cianciulli P., Beomonte Zobel B.

Relationship between myocardial T2* values and right and left ventricular volumetric and functional parameters in thalassemia major (TM) patients evaluated by cardiac magnetic resonance (CMR) (SS 903), B-0571

Di Giampietro I., Liguori C., Sansoni I., Cianciulli P., Mortato L., Beomonte Zobel B.

Black blood versus bright blood T2* acquisition in cardiovascular magnetic resonance (CMR) for thalassaemia major (TM) patients: which can do better? (SS 903), B-0578

Di Grezia G., Gatta G., Liato R., Iacobellis F., Urciuoli L., Parlato V., Grassi R., Rotondo A.

Dynamic MRI defecography vs. entero-colpocysto-defecography in the evaluation of midline pelvic floor hernias in female pelvic floor disorders (SS 201a), B-0191

Diamantopoulos A., Katsanos K., Spiliopoulos S., Karatzas A., Karnabatidis D., Tsopanoglou N., Siablis D.

Parstatin averts development of contrast-induced nephropathy in an in-vivo experimental model (SS 1306), B-0704

Diano D., Ponti F., Sassi C., Garzillo G., Guglielmi G., Salizzoni E., Battista G., Bazzocchi A.

Bariatric surgery and radiologists: besides complications, an important role in the evaluation of treatment efficacy and effects (SS 110), B-0043

Diano D., Andreone A., Garzillo G., Filonzi G., Sassi C., Albisinni U., Battista G., Salizzoni E., Bazzocchi A.

New regions of interest in body composition analysis by dual energy x-ray absorptiometry: liver "adiposity" (SS 1801b), B-0960

Diederich S.

Lung cancer: A. Detection (E³ 1420), A-386

Diederich S.

Imaging the complications of cancer treatment: A. Pulmonary complications of the treatment of malignancy (RC 1616), A-505

Diepstraten S.C.E., Verkooijen H.M., van den Bosch M.A.A.J.

Breast interventions: from diagnosis to treatment: B. Underestimation of disease in needle biopsies (RC 1202), A-342

Dietrich T.J., Betz M., Pfirrmann C.W.A., Koch P.P., Fucetese S.F.

Screw-home mechanism and its influence on tibial tuberosity-trochlear groove (TTTG) distance: measurement on MR examinations of the knee in asymptomatic volunteers in full extension, 15° flexion and 30° flexion (SS 1710), B-0771

Dietzel M., Hopp T., Ruiter N.V., Kaiser W.A., Baltzer P.A.T.

Image registration beyond PET/CT - advanced registration of x-ray - and MR-mammograms is feasible and provides morphological and functional information at a glance (SS 105), B-0144

Dietzel M., Burmeister H.P., Zoubi R., Groeschel T., Gajda M.R., Runnebaum I.B., Kaiser W.A., Baltzer P.A.T.

Impact of T-stage on lesion characteristics and overall diagnostic accuracy of breast MRI: does size really matter? (SS 202b), B-0224

Dietzel M., Schoen K., Zoubi R., Burmeister H.P., Gajda M., Runnebaum I.B., Kaiser W.A., Baltzer P.A.T.

"Magnetic resonance mammography has a high sensitivity but low specificity!": new thoughts and fresh data on an old mantra (SS 905), B-0600

Dietzel M., Zoubi R., Habrecht H., Gajda M., Runnebaum I.B., Kaiser W.A., Baltzer P.A.T.
Computer-aided diagnosis (CADx) is a feasible prognostic biomarker for the noninvasive prediction of axillary lymph node metastases (SS 905), B-0601

Dietzel M., Hopp T., Kreisel P., Ruiter N.V., Burmeister H.P., Kaiser W.A., Baltzer P.A.T.
Fusion of dynamic CE-MRI mammography at 3.0 Tesla with FFD mammography: pilot study using a dedicated semi-automatic registration software (SS 1816), B-0886

Dietzel M., Zoubi R., Burmeister H.P., Groeschel T., Gajda M.R., Runnebaum I.B., Kaiser W.A., Baltzer P.A.T.
Potential of MR-mammography for the differential diagnosis of intraductal papillomas (SS 1802), B-0937

Dietzel M., Zoubi R., Groeschel T., Burmeister H.P., Gajda M., Runnebaum I.B., Kaiser W.A., Baltzer P.A.T.
Reading MR-mammography between the lines: is the "constant-sharpness" a useful tool for prediction of benignity? Introduction, diagnostic accuracy and subgroup analysis of a new descriptor (SS 1802), B-0938

Dietzel M., Habrecht H., Zoubi R., Burmeister H.P., Gajda M., Runnebaum I.B., Kaiser W.A., Baltzer P.A.T.
Breast MRI as a potential new biomarker to assess the axillary tumour load in patients with newly diagnosed breast-cancer: initial data using computer-assisted diagnosis (CADx) (SS 1802), B-0941

Dietzel M., Dietzel A., Zoubi R., Camara O., Bogdan M., Kaiser W.A., Baltzer P.A.T.
Combination of machine learning and computer-assisted diagnosis in breast MRI: systematic investigation identifies high potential to stratify survival outcome in primary breast cancer (SS 1805), B-1007

Dilli A., Ayaz U.Y., Hekimoglu B.

Study of the left renal vein variations and inferior vena cava variations by means of spiral computed tomography (SS 1315), B-0718

Oncologic imaging and paleoradiology in Egypt: the past, present and future: Interlude: Discover Egypt's charm (EM 3), A-244

Hansell D.M.

Patterns in chest radiology: diffuse lung diseases - what the radiologist should know: Chairman's introduction (RC 1604), A-514

Hansmann J., Schoeppler G.M., Henzler T., Haubenreisser H., Reichert M., Attenberger U.I., Schönberg S.O., Fink C.

CT in urolithiasis: potential of dose reduction and impact on image quality using iterative reconstruction (SS 207), B-0204

Hansmann J., Fink C., Meyer M., Apfaltrer P., Schönberg S.O., Henzler T.

Impact of iodine delivery rate with varying flow rates on dual energy CT image quality in patients with suspected pulmonary embolism (SS 504), B-0274

Harms S.E., Hillman B.J., Stevens G., Stough R., Hollingsworth A., Kozłowski K., Moss L.

Diagnostic performance of a dedicated breast MR system using spiral acquisitions (SS 1702), B-0799

Hartel M., Wójcik M., Rudzińska M., Szczudlik A., Kluczeńska E.

Arterial hypertension is associated with rostral ventrolateral medulla neurovascular compression (SS 111a), B-0004

Hatzidakis A.A.

Biliary interventions: Chairman's introduction (RC 1109), A-304

Hausmann D., Dinter D., Schönberg S.O., Brade J., Sadick M., Buesing K.

The impact of acquisition time on image in whole body 18F-FDG-PET CT for cancer staging (SS 1716), B-0787

Haustermans K.

Imaging and tailored radiation therapy in rectal cancer: Treatment tailored according to staging (EM 2), A-142

Havsteen I., Christensen L., Christensen A., Nielsen J., Krieger D., Christensen H.

CT angiography "Spot Sign" predicts haematoma expansion in patients with acute spontaneous ICH (SS 911), B-0502

Heggen K., Johansen E., Silkoset R.

Educational programme for radiography students at CT (SS 614), B-0490

Heijnen L., Lambregts D.M.J., Beets G.L., Maas M., Martens M.H., Cappendijk V.C., Bakers F.C.H., Beets-Tan R.G.H.

Gadofosveset-enhanced MRI for nodal staging in rectal cancer: pitfalls and learning curve (SS 1301a), B-0650

Heinz-Peer G.

Contrast media and tracers: always as safe as we wish?: B. MR contrast agents: rumble in the jungle (RC 406), A-066

Heinz-Peer G.

Prostate and urinary bladder: C. Bladder cancer: state-of-the-art aiming and staging (CC 1621), A-499

Helbich T.H.

My most beautiful mistakes: Breast (SF 7a), A-159

Helbich T.H.

Breast cancer: Chairman's introduction (MS 11), A-280

Helbich T.H.

Breast cancer: From the radiologist's perspective (MS 11), A-281

Helbich T.H.

Breast cancer: Case presentation and discussion (MS 11), A-284

Helbich T.H.

3D breast tomosynthesis and contrast enhanced dual energy: a prototype report (SY 1)

Helck A., Schoen F., Schoenermarck U., Wessely M., Fischeder M., Klotz E., Reiser M.F., Nikolaou K., Becker H.-C.

Quantitative CT imaging of renal perfusion for assessment of renal allograft dysfunction (SS 1707), B-0792

Helck A., Hummel N., Johnson T., Reiser M.F., Graser A.

Characterisation of adrenal masses using single-phase dual energy CT (SS 1801b), B-0966

Helmberger T.K.

Ablation beyond radiofrequency: Irreversible electroporation (NH 8), A-187

Hemke R., Lavini C., van Rossum M.A.J., van den Berg M., Dolman K.M., van Veenendaal M., Schonenberg D., Kuijpers T.W., Maas M.

Pixel-by-pixel analysis of DCE-MRI curve shapes in knees of juvenile idiopathic arthritis patients (SS 1712), B-0864

Henner A., Poysko H., Pietila A.

Radiographer's role in dose optimisation in co-operation with dentists in orthopantomography (SS 914), B-0581

Henzler T., Vogler N., Meyer M., Apfaltrer P., Sudarski S., Schönberg S.O., Fink C.

Impact of different levels of coronary calcium score on the prevalence of coronary artery stenosis in patients with an intermediate pre-test likelihood of coronary artery disease (SS 503), B-0367

Henzler T., Meyer M., Apfaltrer P., Schönberg S.O., Fink C.

Computed-aided stenosis detection on coronary CT angiography in chest pain patients with an intermediate pre-test likelihood for acute coronary syndrome (SS 905), B-0604

Henzler T., Jafarov H., Meyer M., Shi J., Klein S.A., Apfaltrer P., Schönberg S.O., Fink C.

Feasibility of 50% dose reduction in whole body lymphoma staging CT using iterative reconstruction (SS 1713), B-0852

Herbrik M.C., Umutlu L., Kalkmann J., Bauer S., Podleska L., Grabellus F., Taeger G., Lauenstein T.

Diffusion-weighted imaging as a non-invasive predictor of tumour grading in soft tissue sarcoma (SS 1310), B-0640

Herbrik M.C., Umutlu L., Kalkmann J., Bauer S., Grabellus F., Taeger G., Lauenstein T.

Assessment of diffusion-weighted imaging for therapy monitoring in neoadjuvant isolated limb perfusion - therapy of soft tissue sarcoma (SS 1310), B-0643

Herold C.J.

Essentials in oncologic imaging: what radiologists need to know (part 1): B. Lung cancers (primary, metastases) (MC 428), A-093

Heu J.Y.

Robotic science, a future medicine within (Student Session 1), H-4

Heusner T.A., Treffert J., Geiger B., Hartung V., Herbrich M., Forsting M., Antoch G.

Diagnostic accuracy of virtual FDG-PET/CT bronchoscopy for the detection of lymph node metastases in non-small cell lung cancer patients (SS 606), B-0476

Heusner T.A., Hilgard P., Mueller S., Ertle J., Bockisch A., Antoch G.

Radioembolisation with Y-90 glass microspheres in hepatocellular carcinoma: safety and long-term survival (SS 909), B-0529

Monitoring response: the essential guide for all radiologists: Chairman's introduction (RC 1416), A-400

Schlosser T., Burbelko M., Ulrich M., Antoch G., Adamus R.

Percutaneous arterio-venous shunting in patients with severe COPD: a novel interventional treatment (SS 1309), B-0634

Schmaranzer E., Kogler M., Reichkender M., Vavron P.

MR-traction arthrography of the hip in femoroacetabular impingement (SS 1810a), B-0912

Schmid-Tannwald C., Dahi F., Jiang Y., Sethi I., Oto A.

Focal liver lesions in the right and left hepatic lobes on diffusion weighted MR imaging: is there a difference? (SS 1701), B-0819

Schmid-Tannwald C.M., Schmid-Tannwald C., Neumann R., Haug A., Reiser M.F., Rist C.

Comparison of abdominal MRI including diffusion-weighted sequences with 68Ga-DOTATATE PET/CT in detecting neuroendocrine tumours of the pancreas (SS 901), B-0560

Schmidt D., Bieberstein J., Schumann C., Trumm C., Clasen S., Claussen C.D., Pereira P.L.

Fast automatic computation of path proposals for CT-guided radiofrequency (RF) ablation of malignant liver tumours: initial clinical experience (SS 105), B-0148

Schmidt G.P., Biffar A., Dietrich O., Sourbron S., D'Anastasi M., Nikolaou K., Reiser M.F., Baur-Melnyk A.

Quantitative analysis of perfusion parameters in osteoporotic patients with acute vertebral fracture using dynamic contrast-enhanced MRI (SS 110), B-0047

Schmidt G.P., Stieber P., Di Gioia D., Heinemann V., Nagel D., Rist C., Reiser M.F., Baur-Melnyk A.

FDG-PET-CT and whole body MRI for early detection of tumour recurrence in asymptomatic breast cancer patients with tumour marker kinetics (SS 1316), B-0615

Schmidt G.P., Paprottka P.M., Jakobs T.F., Hoffmann R.-T., Baur-Melnyk A., Haug A., Reiser M.F., Rist C.

Whole body MRI and FDG-PET-CT for triage in patients planned for radioembolisation therapy (SS 1316), B-0616

Schmidt S., Meuwly J., Meuli R.

Rectal cancer imaging: the next phase: A. Local and distant staging (RC 801), A-210

Schmitt B., Krusche-Mandl I., Apprich S., Juras V., Trattnig S.

Long-term results 8 years after autologous osteochondral transplantation: 7T gagCEST and sodium magnetic resonance imaging with morphological and clinical correlation (SS 610), B-0439

Schmitt B., Welsch G.H., Zbyn S., Goed S., Trattnig S.

Feasibility of gagCEST imaging on a clinical 3T MRI system: initial results and comparison with sodium imaging at 7 Tesla (SS 1810a), B-0916

Schneider G.K., Massmann A., Buecker A., Fries P.

Contrast-enhanced magnetic resonance angiography in management of pulmonary arterio-venous malformations in patients with HHT (Osler disease) (SS 515), B-0342

Schneider G.K., Schuerholz H., Fries P., Buecker A.

Safety and diagnostic efficacy of gadobenate dimeglumine (MultiHance) in MR imaging of paediatric patients (SS 1306), B-0703

Schoder H.

Essentials in oncologic imaging: what radiologists need to know (part 4): A. Lymphoma (MC 728), A-169

Schoennagel B., Much C., Yamamura J., Tornquist K., Adam G., Wedegärtner U.

Cardiac MRI using a new trigger method: MR compatible Doppler-ultrasound device to trigger the heart frequency in comparison to ECG (SS 1803), B-1004

Schönberg S.O.

Vascular imaging: diabetes and vascular occlusive disease: C. Imaging prior to revascularisation: US, CTA, MRA or DSA? (RC 715), A-184

Schraml C., Schwenzer N.F., Werner M.K., Brendle C., Mueller M., Claussen C.D., Pfannenberger C.

Staging of neuroendocrine tumours: comparison of 68Ga-DOTATOC-PET/CT and MRI (SS 1716), B-0781

Schraml C., Schmidt H., Brendle C., Sauter A., Mueller M., Pfannenberger C., Claussen C.D., Schwenzer N.F.

Comparison of MR/PET and PET/CT in the assessment of pulmonary masses (SS 1716), B-0786

Schramm P., Dolatowski K., Schramm R., Froelich A., Klotz E., Knauth M.

Detection of cerebral vasospasm using dynamic CT: analysis of volume perfusion CT maps and 4D-CT angiography (SS 1711), B-0745

Schreer I.

Evaluation of the treated breast and follow-up: C. Surveillance for and detection of recurrent disease after therapy (RC 1502), A-464

Schueler G.

Polytrauma: redefining imaging issues for management priorities: A. Vascular trauma (RC 1517), A-451

Schuknecht B.F.

Radiological management of traumatic emergencies: A. Maxillofacial trauma (CC 1219), A-323

Schulz A., Dormagen J.B., Drolsum A., Bjørneth B.A., Labori K.J., Klöw N.

Impact of contrast-enhanced intraoperative ultrasound on operation strategy in case of colorectal liver metastasis (SS 501), B-0335

Schulz-Wendtland R., Meier-Meitingner M., Heinz M., Adamietz B., Uder M., Schwab S.

Pilot study for the detection of simulated lesions at a 2D resp. 3D digital full-field digital mammography system with a new developed high-resolution detector on the base of two shifts of a-Se (SS 202a), B-0212

Schwartz E., Langs G., Hofeld J., Czerny M.
An automated method for visualising changes in vessel wall dynamics (SS 505), B-0374

Schwarz F., Grandl K., Arnoldi A., Sommer W.H., Bamberg F., Reiser M.F., Becker H.-C.

Higher iodine concentration permits dose reduction while increasing contrast-to-noise-ratio in high-pitch, wide-range CT angiography (SS 215), B-0252

Schwarz F., Goelz T., Arnoldi A., Nikolaou K., Reiser M.F., Becker H.-C.

Standard vs high-pitch CT of the chest in ventilated patients: comparison of motion artefacts, image noise and effective dose (SS 617), B-0486

Schwarz F., Ingrisich M., Hartmann M., Sourbron S.S., Cyran C.C., Grimm J., Nikolaou K., Reiser M.F., Saam T.

MR-based quantification of adventitial contrast dynamics for the carotid artery as a marker for neovascularization in atherosclerosis: comparison of symptomatic and asymptomatic patients (SS 1815), B-0985

Schwarz F., Nikolaou K., Cyran C.C., Hartmann M., Grimm J., Reiser M.F., Dichgans M., Pfefferkorn M., Saam T.

Reproducibility and differentiation of cervical arteriopathies using in vivo high-resolution MRI (SS 1815), B-0986

Secchi F., Jabbour A., Sardaneli F., Pennell D., Mohiaddin R.

Increased late gadolinium enhancement of the left atrium by cardiovascular magnetic resonance in cardiac amyloidosis (SS 903), B-0576

Sefidbakht S., Babainezhad M., Borhani Haghighi A., Jalli R., Zare Z.

Revised McDonald's criteria for dissemination in space; accuracy in diagnosis of multiple sclerosis from Neurobehcet's disease (SS 111b), B-0088

Sefidbakht S., Khademi B., Hoseini al Hashemi H., Lotfi M., Zare Z., Jalli R., Sefidbakht M.

A subjective score for olfactory bulb injury in post-trauma anosmia (SS 1811), B-0892

Seidel R., Matthes K., Mueller A., Buecker A., Fries P.

Evaluation of T1, T2* and T2 relaxation times in young and aging rat liver at 9.4T (SS 601), B-0449

Seidenbusch M.C., Schneider K.

New conversion coefficients for dose reconstruction in high-resolution computed tomography (HR-CT) of the chest in neonates and infants (SS 912), B-0593

Seker F.

Molecular imaging: a great chance for radiology (Student Session 2), H-9

Sekovski B., Cambj Sapunar L.

A novel technique of percutaneous closure of enterocutaneous fistula (SS 109), B-0035

Selim A.S.M.

Oncologic imaging and paleoradiology in Egypt: the past, present and future: MDCT of Royal Egyptian Mummies: secrets unveiled (EM 3), A-241

Selwaness M., van den Bouwhuijsen Q., Verwoert G.C., Dehghan A., Vernooij M., Hofman A., Wentzel J.J., Witteman J.C.M., van der Lugt A.

Pulse pressure as risk factor for MRI-detected intraplaque haemorrhage in the carotid arteries: the Rotterdam study (SS 1815), B-0984

Sentis M.

Evaluation of the treated breast and follow-up: Chairman's introduction (RC 1502), A-461

Seo N., Gwon D., Ko G., Sung K., Yoon H., Shin J., Kim J., Song H.

Percutaneous Y-configured covered stent placement for malignant hilar biliary obstruction: a prospective pilot study (SS 109), B-0040

Serafin Z., StrzeńIEWSKI P., Lasek W., Beuth W.

Predictors and volume measurement of residual flow in embolised intracranial aneurysms at follow-up (SS 1309), B-0629

Serafin Z., StrzeńIEWSKI P., Lasek W., Beuth W.

Time-resolved imaging of contrast kinetics does not improve performance of follow-up MRA of embolised intracranial aneurysms (SS 1711), B-0740

Serafin Z., StrzeńIEWSKI P., Lasek W., Beuth W.

Follow-up after embolisation of ruptured intracranial aneurysms: a prospective comparison of two-dimensional digital subtracted angiography, three-dimensional digital subtracted angiography, and time-of-flight magnetic resonance angiography (SS 1711), B-0741

Serra G., Ciarlo G., Massacesi V., Fiorelli A., Liberali S., Paoletti M., Catalano C., Macri F., Fraioli F.

Chest MRI in the evaluation of pulmonary alterations detected by CT in the follow-up of paediatric patients with middle lobe syndrome (MLS): comparison with XR (SS 912), B-0596

Sertdemir M., Dinter D., Hausmann D., Michaely H.J., Schönberg S.O., Weidner A.

Interscanner comparison of dynamic contrast-enhanced MRI in prostate cancer: 1.5T versus 3T MR (SS 1816), B-0877

Shaham D., Leichter I., Manevitch A., Bogot N., Lederman R.

New gold-standard for designing a CXR CAD algorithm for lung nodules and assessing its performance (SS 204), B-0168

Shaikh S.M.

Whole body PET/CT compared to whole body MRI in the diagnosis of sclerotic bone metastases (SS 606), B-0475

Sharma A.K.S.

Imaging findings in arterial stenosis and mural involvement in Takayasu arteritis on CEMRA (SS 515), B-0344

Shepherd B., Kumar P., Bryant T.J.C., Breen D.J.

The significance of persistent intra-lesional enhancement of renal tumours following percutaneous cryoablation (SS 209), B-0176

Shim J., Lee C., Kim A., Kim K., Choi J., Lee J., Park Y., Park C.

Paradoxical uptake of Gd-EOB-DTPA on the hepatobiliary phase in the evaluation of hepatic metastasis from breast cancer: is the "target sign" a common finding? (SS 501), B-0330

Shin A.G., Vakhidova Z.A., Safonova N.I., Shinkareva T., Makarenko V.

MDCT evaluation of the tracheobronchial tree anomalies in children with congenital heart disease (SS 604), B-0419

Shinagawa M., Kaida H., Kunou Y., Uchida M., Ishibashi M., Hayabuchi N., Yasumoto M., Naito Y.

Relationship between clinicopathological factors and total lesion glycolysis in pancreatic cancer (SS 901), B-0564

Shiomi T., Szomolanyi P., Juras V., Zbyn S., Trattig S.

Biomechanics of human knee cartilage-loading of knee during 3T MRI (SS 610), B-0430

Shrimpton P.C.

Novel developments in CT and impact on dose: A. Patient dose assessment in CT (RC 1513), A-472

Siddiqui M.A., Ahmad I., Rizvi S.A.A., Ullah E.

Ultrasound scoring system for preoperative evaluation of cholelithiasis: how accurate it is for preoperative prediction of difficult laparoscopic cholecystectomy (SS 101b), B-0098

Sidhu P.S.

CEUS, a solution to reduce radiation exposure in abdominal imaging (SY 24)

Signore A.

Diagnosis of inflammatory conditions: Imaging inflammatory bowel disease: the nuclear medicine perspective (PC 3), A-041

Silvestri V., Marano R., Savino G., Merlino B., Verrillo G., Meduri A., Natale L., Bonomo L.

Is there a role for 64-row MDCT in the follow-up of heart transplanted patients? A comparison study with echocardiography and MR performed on the same day (SS 503), B-0361

Simon M., Drueschler F., Kovacs A., Hunold P., May K., Barkhausen J., Vogt F.

Triphasic multidetector CT for the assessment of intramural haematoma of the aorta and the pulmonary artery (SS 115), B-0111

Singh A.K., Kurra V., Cai W., Harris G., Sahani D.

Development of non-necrotic tumour volumetry criteria for evaluation of therapy response in hepatocellular carcinoma (SS 916), B-0545

Singh A.K., Kurra V., Chen Y.E., Cai W., Nielsen G., Harmon D., Hornicek F.J.

Comparison of viable tumour volumes estimated on dynamic MRI by computer-aided quantification technique with the tumour viability scores of pathology following excision of soft tissue sarcoma's: prospective study (SS 1310), B-0641

Sit C., Dikaio N., Kirkham A., Allen C., Freeman A., Moore C., Emberton M., Kelly J., Punwani S.

Contrast enhanced MRI features of early (microscopic) extra-capsular disease in patients with known prostatic cancer (SS 1816), B-0878

Sjekavica I.

The patient with renal impairment: C. The transplanted kidney (CC 1521), A-449

Sklair-Levy M., Sella T., Cohen M., Rosin M., Allweis T., Shapiro M., Libson E., Izhaky D.

Functional infrared imaging of the breast: automatic breast cancer detection using multiparametric computer analysis (SS 202a), B-0216

Smets A.M.J.B.

Oncologic imaging: how to image, follow up and report: A. Renal and adrenal tumours in children (RC 1212), A-362

Smit E.J., Vonken E., van Seeters T., Dankbaar J.W., van der Schaaf I.C., Velthuis B.K., van Ginneken B., Prokop M.

Poor collateral status on timing-invariant CTA is a strong predictor of poor clinical outcome in acute stroke patients with large vessel occlusion (SS 911), B-0501

Söderman M.

Subarachnoid haemorrhage ('the worst headache ever'): A. Diagnosis of subarachnoid haemorrhage (SAH) (CC 1119), A-270

Solbiati L.

US and contrast-enhanced US for focal lesions: C. Intraoperative and therapeutic applications (E³ 620), A-127

Neurological emergencies: B. Traumatic (E³ 720a), A-139

Stampanoni M., Wang Z., David C., Roessl E., Trippel M., Singer G., Kubik-Huch R.A., Hohl M.K., Hauser N.

Differential phase contrast mammography: a new tool for breast imaging (SS 202a), B-0211

Staskiewicz G., Czekańska-Chehab E., Przegaliński J., Uhlig S., Torres K., Maciejewski R., Drop A.

Volume rendering reconstruction of right ventricle improves interobserver agreement and accuracy of interventricular septum bowing sign in patients with acute pulmonary embolism (SS 1304), B-0623

Stedman J.M., Blick C.G.T., Nazir S.A., Mallett S., Turney B.W., Onwu N.N., Roberts I.S.D., Crew J.P., Cowan N.C.

Evaluation of diagnostic strategies for diagnosing bladder cancer using CT urography, flexible cystoscopy and voided urine cytology: results for 778 patients (SS 207), B-0209

Stefanova M., Kratochwil C., Schwartz L., Haberkorn U., Giesel F.L.

Impact of normal tissue uptake using 68Ga DOTATOC-PET/CT in patients with neuroendocrine tumour - a follow-up study (SS 106), B-0107

Steger G.

Breast cancer: From the oncologist's perspective (MS 11), A-283

Steiger P., Ith M., Gugger M., Kruse A., Fröhlich J., Chong D., Thoeny H.

Comparison of diffusion-weighted MRI and histopathologic findings in kidney transplant patients with deteriorating renal function (SS 1707), B-0793

Steketee R.M.E., Ooms S., Luijten M., Houston G., van Swieten J.C., Smits M.

Arterial spin labelling perfusion magnetic resonance (MR) imaging contributes to the early diagnosis of dementia (SS 511), B-0321

Stojanov D.A., Ilic M., Bosnjakovic P.

New ischaemic brain lesions on diffusion-weighted MRI after carotid artery stenting with protection: a single-centre study (SS 611a), B-0389

Stoker J., Rimola J.

Crohn's disease of the small bowel: which test when?: Chairman's introduction (RC 1901), A-541

Stolzmann P., Gnannt R., Winklehner A., Fischer M., Alkadhi H., Karlo C.

Dual energy split-bolus CT for the detection of urinary stone disease. One phase acquisition: threefold information (SS 207), B-0205

Straiton J.B., Bethapudi S., Poon F.W.

Incidental F-18 FDG positive focal thyroid nodules on PET/CT: evaluation and outcome (SS 608), B-0460

Straiton J.B., Bethapudi S., McCallum A., Han S.

Management of head and neck carcinoma of unknown primary: the diagnostic accuracy of F-18 FDG-PET/CT in detection of the clinically occult tumour (SS 608), B-0463

Strube H., Wirth S., Reiser M.F., Treitl M.

Managing IT services in a completely digitised radiological department with an in-house departmental IT group: a 7-year follow-up experience (SS 1805), B-1014

Stumpp P., Fernau M., van Daal K., Gosch D., Nagel H., Kahn T.

Influence of different iteration levels in fourth generation iterative reconstruction technique on image noise in CT examinations of the abdomen (SS 201b), B-0235

Sudholt P., Urigo C., Bongartz G., Hohmann J.

Comparison of SPACE and 3D-TSE-MRCP regarding image quality and diagnostic certainty in patients in a routine clinical setting (SS 113), B-0128

Sumkauskaitė M., Hillengass J., Heiss C., Dornisch M., Stieltjes B., Schlemmer H.-P., Goldschmidt H., Delorme S.

Diagnostic value of functional magnetic resonance imaging for differentiation of benign osteoporosis and multiple myeloma (SS 1816), B-0880

Sun J., Li X., Yong C., Zhang X., Gao S., Wang Z., Sun Y., Zhang X.

Is it available, by iodine concentration of the active part of renal mass, for differentiation between renal angioliomyolipoma and renal cell carcinoma? (SS 201b), B-0238

Sundin A.E.

Monitoring response: the essential guide for all radiologists: C. Assessment of response using functional imaging: the essentials (RC 1416), A-403

Sutter R., Pfirrmann C.W.A., Espinosa N., Buck F.M.

3D-hindfoot alignment measurements based on low-dose biplanar x-rays: comparison to standard radiographic measurements (SS 1710), B-0769

Sutter R., Dietrich T.J., Pfirrmann C.W.A.

Is the alpha-angle able to discriminate between symptomatic patients with femoroacetabular impingement (FAI) and asymptomatic volunteers? (SS 1710), B-0773

Sutter R., Ulbrich E.J., Jellus V., Nittka M., Pfirrmann C.W.A.

Through-plane distortion correction and view-angle tilting for reduction of metal artefacts at MR imaging in patients with total hip arthroplasty: performance of STIR and T1 sequences (SS 1710), B-0776

Sutton L.N.

New PACS architecture: decoupling image management from image navigation: C. Dismantling PACS: separating the image viewing from the data storage and sharing (RC 1605), A-532

Suwanapongched T., Pornsuriyasak P., Sukkasem W., Rattanasiri S.

The performance of CT severity scores determined from paired expiratory/inspiratory high-resolution CT in predicting the severity of airflow obstruction (SS 604), B-0413

Suzuki C., Nagata M., Kitagawa K., Murashima S., Nagasawa N., Sakuma H.

Abdominal CT with model based iterative reconstruction: comparison with adaptive statistical iterative and filtered back projection reconstruction (SS 201b), B-0237

Sverzellati N.

Phenotypes in obstructive airway disease: how do I image, analyse and report?: B. Chronic obstructive pulmonary disease (COPD) (RC 1904), A-561

Szabó E., Palkó A.

Surprise in the liver: A. Clinical considerations (CC 1618), A-491

Szewczyk P., Zimny A., Bładowska J., Szmyrka-Kaczmarek M., Sasiadek M.

Evaluation of metabolic, perfusion and microstructural cerebral alterations in patients with systemic lupus erythematosus using MR spectroscopy, perfusion and diffusion tensor imaging (SS 111b), B-0089

Szikora I., Gubucz I., Marosfoi M., Berentei Z., Ovary C., Varga D.

Ischaemic stroke ('acute neurologic deficit'): C. Interventional neuroradiology for the treatment of ischaemic stroke (CC 319), A-015

T

Tacelli N., Santangelo T., Scherpereel A., Hachulla A., Remy J., Rémy-Jardin M.

Angiogenesis in non-small cell lung cancer: early assessment of therapeutic response to antiangiogenic chemotherapy with perfusion multidetector-row CT (MDCT) (SS 916), B-0546

Tack D.

Technical and anatomical fundamentals for imaging the lung: B. Radiation dose in lung imaging: issues and practical solutions (MC 322), A-029

Taina M., Vanninen R., Hedman M., Jakala P., Sipola P.

Increased left atrial or left atrial appendage volume: an independent risk factor for cardioembolic stroke in patients without atrial fibrillation? Cardiac computed tomography study (SS 1703), B-0832

Takx R.A.P., Schoepf U. J., Nance J.W., Moscardiello A., Das M., Fink C., Henzler T.

Coronary CT angiography: comparison of a novel iterative reconstruction with filtered back projection for reconstruction of low-dose CT (SS 603), B-0395

Talei Franzesi C.R., Ippolito D., Monguzzi L., Capraro C., Cadonici A.C., Sironi S.

Value of functional MRI with diffusion-weighted imaging in characterisation of indetermined adrenal lesions: comparison with chemical shift imaging (SS 1307), B-0662

Tali E.T.

Infections of the central nervous system: what the radiologist must report: B. Bacterial and parasitic infections (E³ 820a), A-195

Tanaka J., Niitsu M., Momose A., Kido K., Nagashima M., Thiele F.

Human medical imaging with reformed x-ray interferometry using a practical x-ray tube: a preliminary study with normal volunteers (SS 1813), B-0996

Tang L., Zhang X., Sun Y., Li Z., Ji J., Li X., Liu Y., Wu Q.

Sandwich sign of Borrmann type 4 gastric cancer on diffusion-weighted magnetic resonance imaging (SS 201a), B-0197

Tang L., Zhang X., Sun Y., Qi L., Cui Y., Gao S., Li Y.

Material decomposition of spectral CT: a new way in the prediction of response to chemotherapy in gastric carcinoma? (SS 1801a), B-0874

Tang T.W., Wu W.N., Ouyang O.H., Huang H.Y., Liu L.L., Li L.M., Wang W.Y., Xu X.X.

The presurgical T staging of non-small cell lung cancer: efficacy comparison of 64-MSCT versus 3.0T MR imaging (SS 104), B-0021

Tanghe H.

Differentiating skull base lesions: C. Jugular fossa lesions: how to differentiate? (RC 1908), A-565

Tantawy W.H., Ibrahim A.S., Mohamed M.A., El-Gemeie E.H.

Extrapleural paravertebral CT-guided fine needle biopsy of subcarinal lymph nodes (SS 509), B-0282

Taourel P.

How I report: B. CT in a patient with bowel obstruction (RC 701), A-136

Tartari S., Rizzati R., Princivalle M., Capello K., Benea G.

Characterisation of atherosclerotic plaque of carotid arteries: high-resolution multisequence MR imaging vs colour Doppler ultrasonography (US) (SS 1815), B-0978

Tarulli E., Roberts H., de Perrot M., OSullivan B., Dong G., Paul N.S., Patsios D.

Incidental findings in a study screening asbestos exposed workers for lung cancer and mesothelioma using low-dose computed tomography (LDCT): what you can find when you are not looking (SS 104), B-0027

Tashiro M., Ikeda S., Furukawa K., Okamura N., Furumoto S., Iwata R., Yanai K., Kudo Y., Arai H.

Visualisation of amyloid deposition in the heart of familial systemic amyloidosis using [11C]BF-227 PET (SS 903), B-0573

Taupitz M.

From inflammatory to fibrotic processes: B. Molecular imaging of extracellular matrix changes (MC 23D), A-380
